Subcontractor

RSS TEAM CONTRIBUTION

Resilient Support Services, Inc (SDVO SB) established an on-site culture of trust which enabled us to assist in solving challenges as they arose in a timely and cohesive manner, reducing costs, synchronization of effort and economy of effort.

Client's Requirements: (SOW)

Starting in January 2018, contractors began design, surveying, mobilization, utility relocations, and other early construction activities. Community outreach efforts continued in this phase, such as developing clear communications protocols, opening a public information office, continuing coordination with local elected officials, and soliciting input on the aesthetics of components such as stations and sound canopies. Substantial construction began in late 2018. The overall project was completed late 2022. Client required PM, CM and Design Build Management Services as well as others.

RSS Team Contribution: Prime Contractor

Provided on-site project management oversight for all efforts at the site from December 2021 to December 2022. We were responsible for providing project management, project coordinating, project controls and reporting, Project scheduling of all subcontractors procured for the installation of overhead shelter protection systems for some of the busiest rail stations in North America such as Carle Place, Westbury, Floral Park, Merillon etc. Provided an in-depth analysis on the overall quality of work performed. Our CM and project management skills assisted in completion of contracted work in a timely manner. Our team's efficiency has led to the award of multiple follow on task orders and cost savings.
